

Windows 10 Introduction

Length: 1 Day

Course Objectives: To get delegates to a point where they are comfortable navigating around Windows and using the mouse and/or touchscreen. The Windows file management system is covered along with other standard Windows applications.

Who Should Attend: This course is designed for anyone who will be using this version of the Windows operating system on a PC. This course assumes users are new to Windows or inexperienced in its use or upgrading to Windows 10 from an older version. Topics covered include File management, searching, navigation around the operating system and programmes, and the Windows 10 installed features.

COURSE CONTENT
