

## HAZWOPER 8 Hours Supervisor Refresher

**Length:** 1 Day

**Course Description:** The course helps you gain an understanding of hazards and risks of hazardous materials. This course meets the requirements of OSHA 29 CFR 1910.120 for specific training provided to supervisors/managers of personnel who engage in HAZMAT (hazardous materials/waste) management, emergency response or cleanup operations.

This 8 Hour HAZWOPER Supervisor Refresher Training provides information on a range of topics including toxicology, hazard classification, decontamination, personal protective equipment (PPE), and standard emergency response procedures. You will understand basic chemical and toxicological terminology and behavior and understand and apply termination procedures, reporting, and scene management responsibilities

**Who Should Take This Course?** Workers who have taken the initial HAZWOPER Supervisor Training and need to refresh their HAZWOPER can take the OSHA 8 Hour HAZWOPER Supervisor Refresher.

---

## COURSE CONTENT

**After completing the 8 Hour HAZWOPER Supervisor Refresher Training course, the learner will be able to:**

- Fully understand OSHA regulations and requirements related to general site workers
- Comprehend the basic principles of toxicology and how they are related to chemical exposure
- Understand the site control strategy and various operations performed in each work zone;
- Summarize the principles of decontamination and the methods used for decontamination of personnel and equipment
- Understand the importance of personal protective equipment (PPE), and identify and select the appropriate PPE for a particular worksite
- Recognize the physical, biological, chemical, and environmental hazards present on a hazardous waste site
- Recognize a hazardous waste site emergency and understand the appropriate response procedures; and
- Outline the monitoring and detection tools available to workers at a hazardous waste site.
