

## AI for Adaptive Learning and Training

**Length:** 1 Day

---

### COURSE CONTENT

Use machine learning techniques like reinforcement learning to create adaptive assessment, coaching and training programs. At the end of this course, you'll be able to:

- Describe adaptive learning to a colleague or client
- Recognizes potential use cases for adaptive in your own environment
- Select an appropriate model for different adaptive learning use cases
- Create a flow chart to design the flow of an adaptive learning solution
- Select an appropriate tool for developing an adaptive learning solution
- Develop a testing plan for an adaptive learning solution
- Create a governance plan for an adaptive learning solution
- Complete a proposal for an adaptive learning project
