

Innovation & Creativity: *Turning Ideas into Action*

Length: 1/2 Day

Summary: In this course, clients will expand their thinking from “what is” to “what if,” in order to develop strategies and practices that promote innovation. Blending information with activities and exercises, participants will roll up their sleeves and begin the process of innovative thinking and finding creative solutions and opportunities to move their organization forward.

Innovation and creativity can transform organizations, create new methods for solving problems, and add small improvements to existing solutions. Organizations that value innovation realize that standing still is falling behind; what works today may not work tomorrow, and what works next week may not work a year from now. This course focuses on innovation and tools for driving ingenuity and improvement. The course looks at conditions that must exist for innovation to occur, the importance of confirming and validating perceptions, the value of looking at an environment through multiple lenses, tools for thinking deliberately, creativity and ideation exercises, and methods for evaluating and implementing new ideas.

COURSE CONTENT

1: INNOVATION AND CREATIVITY

- Innovative Thinking vs. Creating Thinking
- How Innovative Thinking works
