Managing Projects Through Virtual Teams
Leading a Successful Virtual Team in Project Management

Length: 1 Day

Summary: You may be a project manager who has leadership skills for a greater opportunity of success of your project objectives. Now, though, you've been asked to lead a virtual team. In this class, you will develop the knowledge and skills you need to lead a high-performance virtual team. With heavy emphasis on real-world project examples, students will examine the elements of successful project management within a virtual work environment and apply the generally recognized best practices for effectively leading geographically and possibly globally diverse team members.

COURSE CONTENT

Performance-Based Objectives: Upon successful completion of this course, students will be able to:

- Define the steps of putting together a virtual team and creating the virtual team environment

  a. Understand the key factors that affect work teams: technology, regulatory, political, economic, and social dimensions
  b. Understand the chief project management challenges: time zones, geography, project structure, team member selection and work processes

- Apply stakeholder engagement strategies to secure their support in their value add to virtual team management

- Course Wrap-Up: Successfully managing a virtual team project requires effective project leadership, communication, and people management skills. Becoming familiar with the different dimensions of managing virtual teams from co-located teamwork will lead to your next project delivery success!
